Making the User Friendly: The Ontological Politics of Digital Data Platforms

13 settembre 2019 · 10:00 - 12:30
Centro Federica Weblearning
Centro Congressi Università di Napoli Federico II
Via Partenope, 36 - Napoli

LABoratory on Education and Digitalisation

L@BED is an international and multidisciplinary research laboratory that focuses on the relationship between digitalization and education starting from the adoption of a ‘problematizing’ approach.

L@BED research agenda relates to four main issues: the relationship between digitalization, curriculum, pedagogy and evaluation, the interplay between digitalization and the reconfiguration of the School Form (le forme scolaire), the digital governance and management in education, the interaction between digitalization, changes in the politics of education and the dynamics of the political economy of education.
