

# TERADAYS 2024

19-20 February

Napoli, Italy

Teradays 2024 is the third of a series of events devoted to the science and technology of Terahertz (THz) waves. Previous workshops were held in Rome, U. Sapienza, in 2017 and 2022.

Nowadays, the frequency region between 0.1 and 10 THz is triggering interest in both theoretical and experimental aspects and is considered a frontier area in many scientific disciplines. The workshop will address state-of-art research exploiting 'T-waves' for applications in material science, systems and devices, biomedicine, agri-food, cultural heritage, telecommunications, new acceleration technologies.

**Abstract submission by 15 Jan 2024**

**Workshop starts 19 Feb 2024 09:00**

**Workshop ends 20 Feb 2024 18:00**

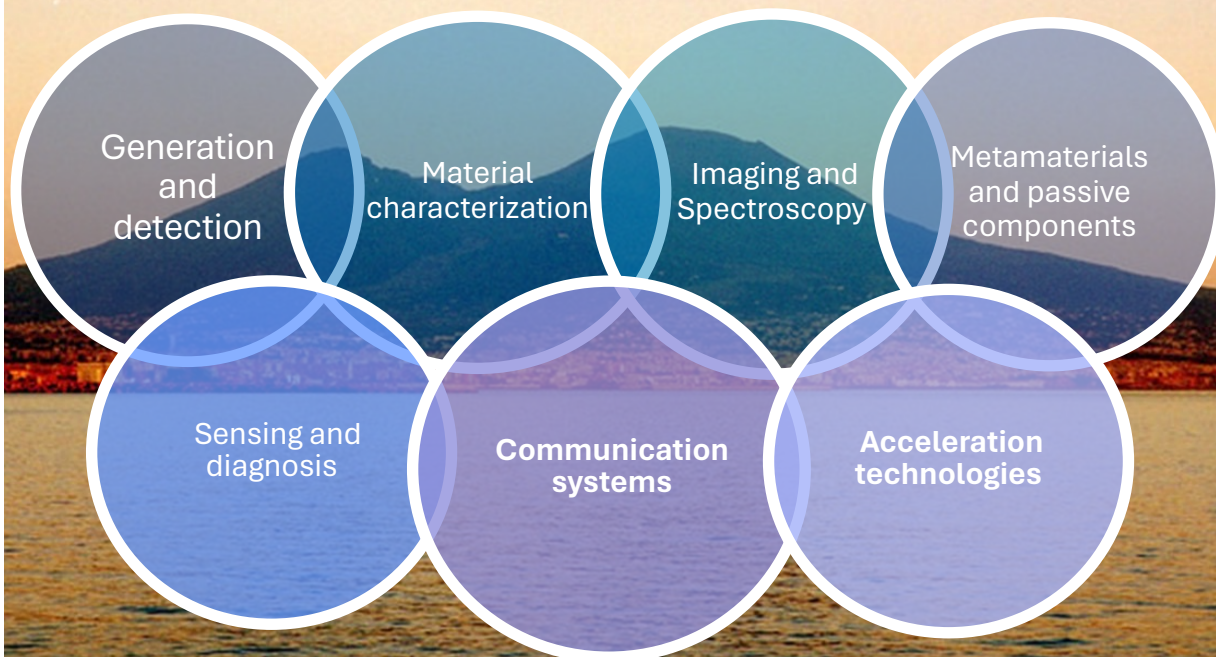

**Prof. A. Andreone**

**Dr. Z. Mazaheri**

**Dr. G.P. Papari**

**Dr. A. Passarelli**
