Architecture

This year the School of Engineering of the University of Naples Federico II celebrates its Bicentenary. Within this framework a day on Steel, Art, Architecture has been organized.

Two eminent personalities have been invited from the world of Art and Architecture who will show their works characterized by high level of complexities.

Steel, together with its intrinsic "sustainability", can exhibit extraordinary applications in the world of art and architecture.

The role of engineering, needed to make possible the realizations, more and more complex and demanding requested by ARTISTAR and ARCHISTAR will be discussed.

➤ h. 8.30

registrations

➤ h. 9.00

welcome addresses

Massimo Marrelli

Rector University of Napoli Federico II

Piero Salatino

Dean School of Engineering University of Napoli Federico II

Claudio Claudi de Saint Mihiel
