OPERATING PROCEDURES FOR THE ORAL TEST

With regard to the operating procedures for the oral test, which will be held online on Microsoft Teams, the Commission establishes that the test will consist of a short interview about the research project submitted by the candidate and possible references to the subject area and academic disciplines of the Ph.D. course.

The Commission, in order to evaluate the candidate’s competence and attitude to scientific research, sets the following evaluation criteria: overall knowledge of the subject, the ability to synthesize and speak clearly, and the ability to make connections with the topics related to the academic disciplines of reference.

As for foreign language proficiency, the Commission establishes that it will be assessed through two questions in English about the candidate’s research project. The language was chosen by all the candidates in the application. The evaluation will result in a positive or negative assessment, which will be integrated in the test’s final score.

In accordance with the draw’s result of the letter D, made by the Commission on April 26, 2021, the candidates that have been admitted to the oral test are required to attend on July 5, 2021, starting at 9.00, on the Microsoft Teams platform.

At the beginning of the oral test, the candidates will have to show a valid personal identification.

President of the commission

Prof. Fabrizio Pane
