- I offer **my expertise to participate as a Partner in a project**
 → **Please** complete all sections of the Form:

Call : FP7-SIS-2010- 1.4.2

Topic: The role of universities in the process towards a knowledge-based society

Offer valid until: **12/2010**

1 Project Information

Activity of the SiS work Programme concerned : 5.1.4 The evolving role of universities

Field of expertise related to the topic:

One of the largest public universities in Turkey with a population of about 30,000 undergraduate and graduate students and 5000 academic staff; Hacettepe University offers well over 300 programmes. Hacettepe University is devoted to high standards in teaching and research, and has the highest number of research papers published in international journals in Turkey. Hacettepe University supports industry-academia partnership and knowledge & technology transfer through its Hacettepe Technology Transfer Center (HTTC).

HTTC prepares a suitable environment for Hacettepe University to develop long-lasting national and international partnerships with businesses and civil society, supports networking activities and facilitates cooperation among them.

HTTC is also a branch of International Steinbeis Transfer Network through which it expands its activities world-wide.

Potential Contribution to the project :

HTTC well knows the barriers in front of a successful knowledge & technology transfer between the universities and the community. Using this experience, HTTC can make valuable contributions to the projects targeting goals like strengthening the role of universities in the building-up of the knowledge-based society, fostering the development of networks and concerted or joint initiatives between universities, and facilitating the diffusion and use of knowledge between the universities and the community.

HTTC personnel consists of experienced industry professionals, qualified specialists in the field of technology transfer and academicians that are familiar with research methodologies and project management.

It has a country-wide communication network comprising other universities, governmental agencies, NGOs and private sector companies by which it can develop and perform effective dissemination and demonstration activities that will surely contribute positively to the expected impact of the project and facilitate the creation of multiplier effects.

Role in the project

Research
 Training

Dissemination
 Technology development

Other
 Demonstration

Project idea:

We are ready to provide our expertise and potential contribution to the projects intended to be prepared in the scope of the topics given above.
