

**Theme 6 „Environment”**  
**Offer for the participation in the project that will be prepared for the 4<sup>th</sup> call for proposals**  
**(date of publication: 30.07.2010)**

<b>The institution</b>	<p><b>WROCLAW UNIVERSITY OF ENVIRONMENTAL AND LIFE SCIENCES</b>  <b>1. DEPARTMENT OF BUILDING AND INFRASTRUCTURE</b>  <b>2. INSTYTUTE OF ENVIRONMENTAL DEVELOPMENT AND PROTECTION</b></p> <p><b>Address:</b> pl. Grunwaldzki 24, 50-363 Wrocław</p> <p><b>Represented by:</b>  1. Edward Hutnik, <a href="mailto:edward.hutnik@up.wroc.pl">edward.hutnik@up.wroc.pl</a>, tel. +48 71 320 55 24, fax: +48 71 32 05 584  <b>Contact person:</b> Ewa Burszta-Adamiak, <a href="mailto:ewa.burszta-adamiak@up.wroc.pl">ewa.burszta-adamiak@up.wroc.pl</a>, tel: +48 71 32 05 555  2. Leszek Plywaczyk e-mail: <a href="mailto:plyw@miks.ar.wroc.pl">plyw@miks.ar.wroc.pl</a>, tel: +48 71 3205595  <b>Contact person:</b> Małgorzata Biniak-Pieróg, <a href="mailto:malgorzata.biniak-pierog@up.wroc.pl">malgorzata.biniak-pierog@up.wroc.pl</a>, tel: +48 71 3201948</p>
<b>Is interested in the participation in a project that will be prepared and submitted in the following topic:</b>	
Number and title of the area	<b>Area 6.2.1.1. Integrated resource management</b>
Number and title of the topic	<b>ENV.2010.2.1.1-1 Integrated management of water and other natural resources in Africa.</b>
<p><b>Short description of the organisation:</b> At the University work 1500 employees, including 200 Professors. There are 10.000 students, 5 Faculties, 39 Departments and Institutes, 33 specialities and 32 post-graduate courses.</p> <p>The Faculty of Environmental Engineering and Geodesy started in October 15, 1950. Faculty has the professional and scientific achievements in a variety of disciplines, combining science and agriculture, engineering and technology. The Faculty is organised in 3 Institutes and 5 Departments.</p> <p>Major research areas in Department of Building and Infrastructure are environmental engineering, water system and stormwater management, water protection, waste treatment and water supply. Employees are experienced in urban drainage, water supply, sewerage system, sewage treatment plant, monitoring of environment. Research areas are focused on storm water management by means of alternative infiltration facilities such as green roofs and infiltration module in urban areas.</p> <p>The Institute of Environmental Development and Protection consists of 4 Departments, among others Department of Agro and Hydrometeorology with its Agro and Hydrometeorological Observatory where there observations and experiments are carried out, concerns on the assessment of the influence of weather and climate on the growth and cropping of crop plants, predicting of soil water reserves, modelling the circulation of water in the soil profile, drought assessment, climate change.</p>	
<b>Proposed contribution to the project:</b>	
<ul style="list-style-type: none"> <li>- storm water management in alternative infiltration facilities ( best management practices BMP) in the aspect of climate changes in local and macro region scales.</li> </ul>
