1. Project Proposal Information

Project Proposal Title	
Project Proposal Acronym	
Call Identifier	FP7 Transport 2010 7.2.7. THE 'EUROPEAN GREEN CARS INITIATIVE'
Topic(s)	SST.2010.7.8. Green Cars - Integrated EU demonstration project on electromobility SST.2010.7.5. Advanced electric vehicle concepts <i>(Example: SST.2010.1.1-1. Carbon footprint of freight transport)</i>
Funding Scheme	Collaborative Projects - Small and Medium Scale
Keywords	
Abstract	
Project Description (Main Work Packages)	Electric drive system for passenger car
Current Consortium (Partners, Organisation Types)	None
Deadline for Responses	Jan 2010

2. Profile of the Partners Sought

Organisation Type	Small and Medium Scale Enterprise
Required Skills and Expertise	Producer (s) of electrical drive system for vehicles and project management
Role in the project	Lead partner of group
Other Requirements	

3. Project Proposer Information

Bristol Cars Project 2010 –2012

FP7 7.2.7. THE ‘EUROPEAN GREEN CARS INITIATIVE’

SST.2010.7.8. Green Cars - Integrated EU demonstration project on electromobility

SST.2010.7.5. Advanced electric vehicle concepts

Company:

Bristol cars are a small specialist passenger car manufacturer who has been producing exclusive cars by hand for over 60 years.

The cars are based on Bristol’s own chassis and are fitted with hand made aluminium panels, trim and fittings all produced in their factory in the city of Bristol.

The current production uses larger capacity engines to provide smooth controlled performance for their distinctive cars. A private company with a high level of engineering expertise.

Project:

Bristol wishes to move forward with the development of their products and would like to make use of the latest technology as they start to expand into the mainland European market.

The level of skill within the factory and the production of all major body components. Allows Bristol to develop and manufacture prototypes and production models very quickly and efficiently.

Partners:

Bristol are looking for European partners who are able to supply electric drive systems suitable for passenger cars designed to travel long distance through Europe and the continent.

Partners with FP7 experience would be a significant advantage. They have not previously been involved in these projects, but are willing to be responsible for areas of project management as well as prototype vehicle manufacture and development.

Marque Approved Limited have been asked to organise the Bristol project, act as main contact and ensure the vehicles are approved to EU standards.
